Microsoft Excel 365 - Basic & Advanced

GoSkills online course syllabus

Thursday, May 2, 2024

Skill level	**Lessons**	**Accredited by**
Beginner & Intermediate	61	CPD
Pre-requisites	**Versions supported**	**Video duration**
None	2010, 2013, 2016, 2019, 2021, 365	5h 46m
Estimated study time	**Instructor**	
26h for all materials	Ken Puls	

Getting to Know Excel

1   The Ribbon

Identify the terminology and elements of the Ribbon.

2   The Work Surface

Recognize the main terms used to describe Excel's work canvas.

3   Navigation

Utilize the keyboard or mouse to select cells and ranges in a spreadsheet.

4   Controlling Your Start Experience

Decide what happens when you start the Excel application.

5   Creating Your First File

Create your first Excel file, enter data, and create a table.

6   Formatting

Format cells by selecting fonts and color fills to make information more attractive.

7   Basic Math

Utilize basic mathematics including multiplication and division in Excel.

Essential Formula Knowledge

8 Formula Anatomy

Understanding Excel Formula Anatomy

9 Cell Referencing - Theory

Learn about working with absolute and relative cell referencing.

10 Cell Referencing - Example

See absolute and relative cell referencing in practice, and learn about ways to copy and paste formulas.

11 Function Anatomy

Use to understand the anatomy of Excel functions and what their components mean.

12 Math Functions

Learn basic math functions including SUM, ROUND, and SUBTOTAL.

13 Basic Statistics

Learn basic statistical functions including COUNT, COUNTA, AVERAGE, MAX, MIN, MEDIAN, and MODE.

14 Logic Functions

Learn to build standalone logical IF functions and make them more complex by nesting AND and OR within them.

15 Text Functions

Learn to break apart text with the LEFT, RIGHT, MID, FIND and SEARCH functions, and to combine text with the & character.

16 Understanding Dates

Understand how dates work in Excel using the TODAY, YEAR, MONTH, DAY, and DATE functions.

17 Understanding Time

Understand how time works in Excel and how to change from whole numbers into time increments and back again.

Intermediate Formula Knowledge

18 Formula Auditing

Learn to work with formula auditing tools including tracing precedent and dependent cells and formula evaluation.

19 Conditional Math

Learn to use SUMIF, COUNTIF, and SUMIFS to add cells only when certain conditions are met.

Optimizing Data

Data Analysis

32 Creating PivotTables
Learn to create and modify basic PivotTables for quickly summarizing and highlighting data.

33 Formatting PivotTables
Learn to control formatting and other options in PivotTables.

34 Calculated Fields in PivotTables
Learn to create and modify basic calculated fields for PivotTables.

35 What-If Analysis
Learn to perform what-if analysis in Excel using the Scenario Manager and Goal-Seek.

Get and Transform Data

36 Unpivoting Data
If you work with PivotTables a lot, you know that they put information out the way users want to read it, but you can't use it to drive another PivotTable. So what if there was an easy way to unpivot the data? There is, and it's called Power Query!

37 Contiguous Data
Learn tricks for consolidating your data so it's vertically contiguous (without blank rows) – for Tables, PivotTables, and Charts.

38 Importing from Text Files
Importing data from a text file into an Excel table.

39 Appending Tables
Appending tables is the process of stacking them vertically to create long tables that can be used to feed business intelligence solutions and PivotTables.

Presenting and Reporting

40 Cell Formatting
Learn to work with the Format Cells dialog to apply text rotation and borders, and to center data across multiple cells.

41 Outlining
Learn about adding and working with Excel's outlining tools to quickly hide irrelevant sections of your worksheet.

42 Custom Number Formats

Learn to build your own custom number formats to display dates, values, and variances how you want to see them.

43 Conditional Formats with Built-In Rules

Learn to create top/bottom and highlight cell rules, as well as apply icon sets and data bars.

44 Conditional Formats with Custom Rules

Learn to create custom conditional formatting rules based on formulas.

45 Building Column Charts

Learn how to create an effective column chart by reducing ink and 'noise' that distract from the main messages.

46 Building Bar Charts

How to create an effective bar chart by reducing ink and noise that distract from the story.

47 Building Pie Charts

Learn how to build an effective pie chart, and when you should and shouldn't use them.

48 Building Line Charts

How to create an effective line chart through careful manipulation of chart elements to enhance its storytelling ability.

49 Building Combination Line and Area Charts

When you want to graph 3 line series, but only want 2 in focus most of the time.

Validating and Updating

50 Data Validation

Learn how to use Data Validation to ensure that users enter valid data in input cells.

51 Data Validation Lists

Use to restrict users' ability to enter invalid data in cells by providing them with a drop-down list of valid options.

52 Comments and Notes

Learn about creating, reviewing, and printing Excel comments.

53 Styles

Learn how to apply built-in number styles and create your own custom styles packages.

Dynamic Arrays

54 Introduction to Dynamic Arrays
An introduction to the new Dynamic Arrays capability added to Microsoft 365.

55 Introduction to FILTER
Learn how to filter a range of data based on criteria you define with the FILTER function.

56 FILTER and 'IFS' Functions
Using FILTER to restrict the results of a Dynamic Array based on one or more conditions.

57 FILTER with AND-OR Conditions
Combining multiple conditions in a single FILTER to restrict the results of a Dynamic Array.

58 XLOOKUP and Dynamic Arrays
Advanced options for XLOOKUP including using wildcard matches and returning Dynamic Arrays as an output.

Preparing to Deploy

59 Custom Views
Learn how to create and manage Custom Views in a worksheet.

60 Page Setup Options
Learn about page setup options, fitting print jobs on a page, headers and footers, and other ways to customize print jobs.

61 Security Considerations
Learn about the setup and weaknesses of Excel's security systems.
